## Projects

---

### WhatsApp Clone

[GitHub](#)

- Developed a real-time chat application mimicking core WhatsApp features using Firebase Realtime Database and Authentication..
- Implemented one-to-one messaging, user authentication, online status display, and image sharing.
- Designed a clean and responsive UI using XML with modern Android design principles.

- Java, Firebase, Android Studio

### PDF Reader App

[GitHub](#)

- Built a standalone Android application for viewing PDF files stored locally on the device.
- Integrated file picker functionality with permission handling and efficient PDF rendering.
- Focused on performance and memory optimization for large PDF files.

- Java, Android Studio, PDFView Library

### Quiz Admin Panel App

[GitHub](#)

- Designed an Android app to allow administrators to add and manage quiz questions in real-time.
- Integrated Firebase Realtime Database and Firebase Authentication for secure data handling
- Included image upload support using the Imgur API with JSON response parsing.

- Java, Firebase, Android Studio, Imgur API

### Simple Chatbot

[GitHub](#)

- Developed a user-friendly chatbot application using Streamlit for the frontend interface.
- Integrated Google's Gemini Pro API to generate AI-powered conversational responses.
- Implemented robust error handling mechanisms to manage API exceptions and ensure smooth user interactions.

-Python, Streamlit, Google Generative AI (Gemini Pro)

## Educations

---

### Bachelor of Engineering (B.E) in Computer Science

2024 – 27 (*Expected*)

- Shri Sant Gajanan Maharaj College of Engineering (SSGMCE)
- Shegaon, Maharashtra

### Diploma in Computer Engineering (Polytechnic)

2021 – 24 (*Graduated*)

- Government Polytechnic, Arvi
- Arvi, Maharashtra

- 86.00 Percentage

## Skills

---

- **Languages:** C++, C, Java, JavaScript, Python, Android(Java based)
- **Framework & Databases:** React.js, MySQL
- **Tools & Platforms:** Git, GitHub, VS Code, Android Studio, Linux (*Basic*)
- **Other:** Operating Systems, Firebase
